The aim of this booklet is to present a profile of average Japanese workers through selected statistical figures.

It contains labor statistics relevant to successive stages of a worker's life from school graduation and entering an enterprise to reaching his/her retirement age and receiving retirement allowances. Almost all the statistics are based upon official sources. The statistics on employment, wages and working hours constitute the core of this booklet.

As it is a matter of great concern presently, the booklet also contains statistics on the increase of female and non-regular staffs, as well as changes in the employment structure.

Tables and graphs are utilized for aiding visual understanding, and statistics of major countries are included to enable international comparisons to be made.

33. Definitions of Unemployment in Different Countries

各国における失業者の定義

	Definition of unemployment	Definition of the unemployment rate
Japan	Labour Force Survey. Persons aged 15 and over who were not working, were capable of immediately accepting work, and were seeking work during the survey week. This includes those waiting for results from past job searches.	Number of unemployed / Total labor force ¹⁾
United States	Current Population Survey (CPS). Persons aged 16 or over who were not working during the survey week, were capable of immediately accepting work (except in cases of temporary illness), and had sought work within the preceding four weeks. This includes workers who had been laid off and were on standby for restoration to their previous jobs.	Number of unemployed / Total labor force (Excludes members of the armed forces)
France	Employment Survey (Enquête Emploi). Person aged 15 or over who were not working during the survey, were capable of accepting employment within two weeks, and had sought work within the preceding four weeks including the survey week, or who were on waiting to start to new work within three months.	Number of unemployed / Total labor force
Germany ²⁾	Microcensus (Mikrozensus). Persons aged 15 to 74 who work less than one hour per week, were capable of accepting employment within two weeks, and had sought work within the preceding four weeks.	Number of unemployed / Total labor force (Excludes members of the armed forces)
	Number of the registered unemployed: Administrative statistics from the Germany Federal Employment Agency. This is the number of people registered to find work at public employment security offices. Specifically, these are people aged under 65 who work less than 15 hours per week, who are capable of accepting work as an employee more than three months found for them by a public employment security office, and had sought work. This excludes those who have participated in a training by Federal Employment Agency.	Number of the registered unemployed / Total labor force (Excludes members of the armed forces)
Italy	Labour Force Survey. Persons aged 15 or over who were not working during the survey week, were capable of accepting employment within two weeks, and had sought work within the preceding four weeks.	Number of unemployed / Total labor force (Excludes members of the armed forces)
United Kingdom	Labour Force Survey. Persons aged 16 or over who were not working during the survey week, were capable of accepting employment within two weeks, and had sought work within the preceding four weeks. This includes those who have found employers and are on standby for jobs.	Number of unemployed / Total labor force (Excludes members of the armed forces)

- Notes: 1) The major enterprises surveyed are, as a rule, those listed in the First Section of the Tokyo Stock Exchange or Osaka Stock Exchange that are capitalized at 2 billion yen or more, have 1,000 or more employees, and have labor unions. The small and medium scale enterprises surveyed are approximately 8,000 enterprises that have fewer than 300 employees and have labor unions.
- 2) Figures for major enterprises for 1979 and earlier are simple averages per enterprise, and from 1980 they are weighted averages based on union membership per enterprise. All figures for small and medium scale enterprises are simple averages per enterprise.
- 3) Annual increase rates in lump-sum payments over the previous year were calculated from the increase rates for enterprises for which the figures from the previous year for the same enterprise could be compared. Increase rates are not determined by comparison of the agreed increase for the current year with that of the previous year.
- 4) Compilations include NTT and Japan Tobacco Incorporated, construction and services from 1987, and the seven JR corporations from 1988.

2) Regular workers of business places that employ 30 or more persons in monthly labour statistical survey. Including bonuses and other specially paid wages. Work hours are total actual working hours.

3) For private-sector manufacturing and construction workers, non-supervisory workers (since 1985); industrial classifications changed from 1988 onward.

4) Values are as of October each year. The objects of survey changed in and after 1998. The unit before 1995 is francs/hour. 1 Euro = 6.55957 francs

5) Former West German territory before 1995. Including family allowances directly paid by employers. On a mark basis before 2000. 1 euro = 1.95583 marks

6) Index sets as 1995: 1990=100, 2000: Dec., 1995=100, 2003-2004: Dec., 2000, and from 2005, Dec., 2005=100.

7) Figures for April every year, excluding Northern Ireland, including wage rates of adult full-time workers.

8) Statistics method was changed in 1998. Industrial classification changed in and after 2006.

9) Figures for March every year, excluding public enterprises (from 1994), wage rates for scheduled hours worked.

43. Trend in Hours Actually Worked and Non-scheduled Hours Worked

実労働時間数及び所定外労働時間数の推移

Source: Ministry of Health, Labour and Welfare, *Monthly Labour Survey*

- Notes:
- 1) The total of hours actually worked is the sum of scheduled hours worked and non-scheduled hours worked. The scheduled hours worked is the number of hours actually worked between the start and close of working hours according to the employment regulations of an establishment, and the non-scheduled hours worked is the number of hours actually worked when starting work early, working overtime, being summoned for unscheduled work, working on holidays, etc.
 - 2) Annual hours worked were calculated by multiplying monthly hours worked by 12 and rounding off fractions below decimal point.
 - 3) Establishments with 30 employees or more selected for survey were switched in January of 1961, 1964, 1967, 1970, 1988, 1991, 1993 and 1996, and in April of 1973, 1976, 1979, 1982, and 1985. However, actual numbers have not been corrected to reflect gaps in the time series, so care is required in comparing time series by actual numbers.

Notes: 1) The number of labour unions is a totaled result of local trade unions (unit unions) and the number of union members is a totaled result of members of individual labor unions. Local labor unions comprise locally organized unions (unions having no organizations of lower levels) and those which are the lowest-level organizations of individually organized unions (unions having organizations at lower levels) and are treated as local unions, each counted as one union. Individual labor unions comprise locally organized unions and the headquarters of the individually organized unions, each counted as one union.

2) These numbers are calculated by dividing the number of union members by the number of employees ("Labour Force Survey" of June each year by the Statistic Bureau of the Ministry of Internal Affairs and Communications).

Notes: 1) "Part-time workers" are workers who work fewer scheduled hours in one day than general workers at the business establishment, or, even if the daily hours worked are the same, who work fewer scheduled days in a week, and who are referred to at the business establishment as part-timers, part-time workers, etc.

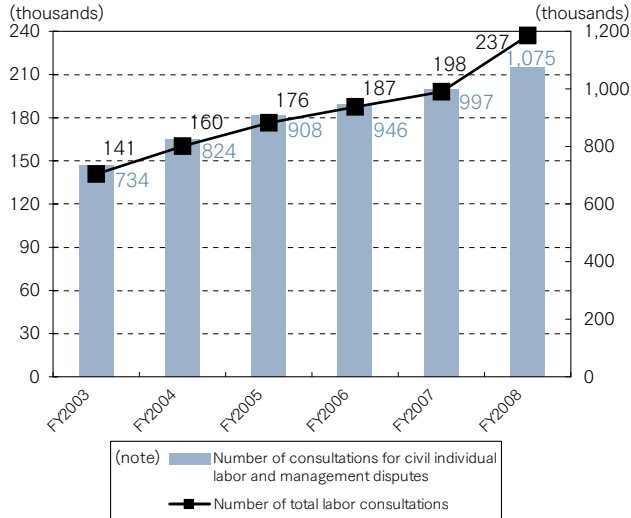

2) The "estimated organization rate" is a figure obtained by dividing the number of part-time worker members in labor unions by the number of short-time workers.

3) Number of part-time workers in trade unions in 2009 is approximate in 1,000 persons.
