
JILPT Research Activities

Publication of Various Research Results in Response to Global Requests

In response to requests from the mass media and experts in Japan and abroad, JILPT has its research fellows, researchers, and other staff provide briefings on specific themes related to labor issues, based on their research results, at various seminars and external workshops. Also from this May to August, JILPT actively responded to various requests from outside concerning labor policy studies based on its regular research activities, which included a presentation made by a JILPT research fellow in charge of labor economics, at the request of the U.S. embassy, on the theme of “countermeasures against the graying of the population and labor shortage in Japan,” and a domestic media interview given by a JILPT researcher closely watching labor trends in foreign countries on the theme of “society and employment problems of young people in the UK.”

Research Reports

The findings of research activities undertaken by JILPT are compiled into Research Reports (in Japanese). Below is a list of reports published in 2010 and 2011. The complete text of these reports in Japanese can be accessed from the JILPT website (<http://www.jil.go.jp/english/index.html>). We are currently working on uploading abstracts of reports in English onto the JILPT website as well.
