Economy
The Japanese economy is recovering at a moderate pace while weakness is seen recently in exports and industrial production in some sectors. Concerning short-term prospects, weakness remains for the time being in some areas, but the economy is expected to continue recovering, supported by the effects of the policies, while employment and income situation is improving. However, attention should be given to the effects of situations over trade issues on the world economy, the prospect of the Chinese economy, the uncertainty of situations and policies in overseas economies and the effects of fluctuations in the financial and capital markets.
