Source: Ministry of Education, Culture, Sports, Science and Technology, **Statistical Abstract, 2012**

Notes: 1) Graduating in March of each year.

2) The ratio of new graduates entering the labor market is calculated as follows:

Ratio = (new graduates entering the labor market + new graduates working while continuing their educations or going to special training schools, etc.) / new graduates not continuing their educations

3) Indicates the ratio of new graduates entering high schools and technical colleges.

4) Indicates the ratio of new graduates entering graduate schools.

5) Beginning in 1980, Okinawa is also included.
