Notes: 1) "Unit unions" are locally organized unions with no lower-level chapters. Statistics for unit unions are based on data from unit unions and from the lowest-level chapters of individually organized unions.

2) These numbers are calculated by dividing the number of union members by the number of employees (Labor Force Survey of June each year by the Statistics Bureau of the Ministry of Internal Affairs and Communications).

3) Estimated organization rate in 2011 is not available, because of the Great East Japan Earthquake.
