- Notes: 1) "Part-time workers" are workers who work fewer scheduled hours in one day than general workers at the business establishment, or, even if the daily hours worked are the same, who work fewer scheduled days in a week, and who are referred to at the business establishment as part-timers, part-time workers, etc.
- 2) The "estimated organization rate" is a figure obtained by dividing the number of part-time worker members in labor unions by the number of short-time workers.
- 3) Estimated organization rate in 2011 is not available, because of the Great East Japan Earthquake.
